

**Award-winning Futurist
Europe's Top 30 Women in Digital**

Recently named one of ten most trailblazing entrepreneurs of Asian origin as the Founder of ambitious social innovation advisory FutureScape 248, Shivvy Jervis has proven herself to be one of the most illuminating Futurists of her time.

The Director of the World Economic Forum cites her as “a thought leader beyond compare” and the Global Curator of TED Talks lauds Shivvy’s “remarkable capacity to make complex concepts palatable”.

A former contributor to CNN Asia and Reuters, Shivvy has notched up over 12 years of broadcasting experience and 400+ hours of programming. She was invited by Discovery Channel to present a two-part documentary on our future cities and hosted 12-part interview series NextTech Insider. Shivvy also previously created and fronted two streaming video series that drew a 14 million-strong audience during its run.

Shivvy’s insights have earned an astounding 24 pieces of recognition - highlights include receiving a Britain’s Asian Women of Achievement award and named one of Europe’s female Role Models of the Year for 2020. She is known for her unique ability to zero in on only the most remarkable innovations that will advance both business and mankind, and to be one of a tiny handful of women in her field. Shivvy champions a move from our current phase of ‘Industry 4.0’ to a more human-centred reality - one she calls Humanity 5.0. She examines in equal measure the future of our business and economy.

Four-time awardee Shivvy Jervis captivates in her broadcasts and keynotes audiences of thousands. Indeed, she is trusted by the likes of the United Nations, the office of the Mayor of London, the BBC and Microsoft. The in-demand speaker and presenter is currently engrossed in developing a factual TV series hunting down the most riveting breakthroughs that will elevate what she considers the most crucial asset of society - our human potential.
